EDUCATION

• National Institute of Technology, Warangal

2027

B.Tech in Computer Science and Engineering

CGPA: 7.64

• Narayana College

2023

Board of Intermediate Education, Telangana

Percentage: 98%

EXPERIENCE

• Visa

May 2026 – Current

Software Engineering Intern

Bengaluru, India

- Designed and developed a prototype framework to automatically convert Talend ETL jobs into equivalent PySpark ETL code, reducing manual migration effort and improving consistency.
- Worked on migration of the Global Opcerts application by processing Denodo log data, applying transformation logic, and loading datasets into HDFS/Hive environments.
- Leveraged Claude-based GenAI techniques along with Java, Talend ETL, and PySpark to accelerate code generation and standardize ETL modernization workflows.

PROJECTS

• Distributed In-Memory Key-Value Store

May 2026 – Present

Building a high-performance Redis key-value store from scratch.

- Tools & Technologies used: C++, TCP Sockets, Multithreading, STL, Linux
- Implementing core Redis operations including GET, SET, DEL, and key expiration using optimized in-memory data structures.
- Developing a multi-client TCP server with concurrent request handling and low-latency data access.

• Travel Diary

May 2025

Developed a full-stack CRUD web application to log and manage travel experiences with authentication.

- Tools & Technologies used: React, Node.js, Express, MongoDB, JWT, Axios, Tailwind CSS
- Implemented user authentication using JWT and protected private routes for secure access.
- Designed RESTful APIs following MVC architecture.
- Developed strong skills in full-stack integration, API design, error handling, and scalable folder structuring.

• File Zipper using Huffman Encoding

Feb 2025

Implemented a custom file compression tool using Huffman coding to reduce file size while preserving data integrity.

- Tools & Technologies used: C++, File I/O
- Generated Huffman trees and encoded characters into variable-length binary codes for compression.
- Reduced file sizes by 30–70% on average through Huffman compression logic.

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Java, Python, JavaScript, HTML, CSS, SQL, R

Developer Tools: VS Code, Git, GitHub, Google Colab

Frameworks/Technologies: React.js, Node.js, Express.js, PySpark, Talend ETL

Databases & Big Data: MongoDB, Oracle SQL, Hive, HDFS

Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks

Areas of Interest: Software Development, Competitive Programming, Machine Learning, Data Engineering

ACHIEVEMENTS

- Achieved a peak LeetCode rating of 2086, ranked 224 out of 27,350 participants in Weekly Contest 501.
- Selected for Amazon ML Summer School 2025, a highly competitive ml program organized by Amazon.
- Secured a rank of 699 in LeetCode Biweekly Contest 161 out of 31,670 participants.
- Solved 1100+ DSA problems across LeetCode and GeeksforGeeks, enhancing algorithmic thinking.
- Actively participated in Volleyball and Badminton competitions and contributed significantly to team's victory.
